

## How to Update AlphaSYS® 6.0

20<sup>th</sup> October 2011

- I. Only for existing AlphaSYS®6.0 version!
- II. Be sure that the AlphaSYS®6.0 is closed

### Update AlphaSYS®6.0

1. Click on the link below and download the file  
[http://www.alpha-passoni.de/Setup-AlphaSYS/V61/AlphaSYS\\_6\\_Update.zip](http://www.alpha-passoni.de/Setup-AlphaSYS/V61/AlphaSYS_6_Update.zip)
2. Now, unzip the downloaded package to the AlphaSYS-folder on your system.
3. Start the unzipped file "**AlphaSYS\_Update\_2011-10-10.exe**".  
Click on the button "Update AlphaSYS" and the updater will actualize the program.  
Close the Updater after the process is finished.
4. Now, start AlphaSYS® and customize the software. Therefor click on "**Customize Database**" and choose the "custdata.lic" – push on button **OK** and it's done after few seconds (*a message on left bottom of the window "Finished Customization"*). Click on Exit.

Ok, it's done! Now, you can use our AlphaSYS®6.1 software.

**Note** You can also download our full software by using this link  
<http://www.alpha-passoni.de/Setup-AlphaSYS/V61/alphasys611.exe>
