

Step 1:

First, check all points and if all is fulfilled, please continue with the description.

- Do you have administrative rights for your system?
If not, the software cannot be installed on your system.
- Do you have at least Microsoft Office 2007 installation on your computer?
If not, the software will not run correctly.
- Do you have a license file for customizing the software AlphaSYS®?
If not, not problem - you can get one by using our contact form:
<http://www.alpha-passoni.de/contact-en/>

Step 2:

Please, uninstall the previous versions of AlphaSYS®. Afterwards, delete the entire folder „AlphaSYS“ from your hard disc drive (C:\Program files(x86)\AlphaSYS) before proceeding to step 3.

Step 3:

1. Download the latest AlphaSYS® version by clicking on the download link below:
http://www.alpha-passoni.de/Setup-AlphaSYS/72/AlphaSYS_7.2.0.exe
Download is completed!
2. Run the downloaded file AlphaSYS_7.2.0.exe and follow the instructions.
Installation is completed!
3. Start AlphaSYS® and you will see a window with the following message:
„You have called the AlphaSYS_Updater. Therefore we will close AlphySYS® and start the AlphaSYS - Updater. Follow the instructions of the update and restart after completion of the customizations AlphaSYS®“
4. Click OK and the updater will open. Now, click on the Customize Database button, choose your license file custdata.lic, and accept this by clicking on the button OPEN.
AlphaSYS_Updater window shows a green background!
5. Now, you can close the AlphaSYS_Updater.

We wish you best of success with our software AlphaSYS®.
